

iPhone Application

General guidelines

Submission

- Materials have to be sent to banner@persgroep.be.
- We will send feedback within 24 hours after material reception.
- All elements should work properly on sending.

Delivery delays

- 3 business days

File format & HTML-specs

- All material should be delivered in HTML5, PNG, JPEG or (animated) GIF.
- The HTML page can either be hosted at advertiser or at Publisher side. It can use HTML5/CSS3/JavaScript (for video or interactivity), but should be tested thoroughly in Mobile Safari on iPhone.
- Browser plug-ins (Flash, Silverlight, Windows Media ...) are NOT supported on iPhone.
- The HTML page should be tested in Mobile Safari on iPhone in portrait and landscape mode.
- All ads should point to the landing page. Links to other apps are not permitted.
- Advertiser should be clearly mentioned and the ad cannot look exactly like editorial content.

Landing page

The page which appears in a browser-view within the app (Mobile Safari based), after clicking (tapping) the interstitial ads (no click-through on Splash or Post-Splash possible).

- URL from an iPhone compatible HTML-page (see specs above).
- Page should be optimized to display in portrait view (landscape view is not supported in our app).
- Page should be tested in Mobile Safari on iPhone.
- Portrait: 320 px width (horizontal scrolling is not attractive), height is unlimited (vertical scrolling is possible).
- You can call an external app from the landing page.
